Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

1. Claim 3 objected to because of the following informalities: It reads that it is dependent upon cancelled claim 2. It should be according to claim 1. Appropriate correction is required.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

4. Claim 24 is rejected under 35 U.S.C. 103(a) as being unpatentable over Dadinis US 6,107,536.

As to claim 1, Dadinis teaches a bandage having an absorbent layer (7) with a compliant element (2), and a backing layer (5). The reference does not specifically state the method as set forth in the claims but it would have been obvious to one having ordinary skill in the art at the time of the invention that the invention as taught by Dadinis can be made by the method of securing the border portions of the backing layer (5) to the border portion of the absorbent core (7), sealing peripheral edges of the absorbent core with the border portion of the backing layer (see fig. 2), connecting a central portion

of the backing layer (5) to a central portion of the absorbent core (7), and forming a compliant element by drawing a portion of the backing layer away from the absorbent core (compliant element being the domed pleated portion that allows flexibility and expansion of the bandage) for the purpose of making the dressing more flexible by stretching the layers.

Allowable Subject Matter

5. Claims 1 and 15-23 are allowed. Claims 3 and 4 would be allowable but are objected due to minor informalities in claim 3.
6. The following is an examiner's statement of reasons for allowance: As to claim 1, the prior art does not teach or suggest forming a compliant element of a wound dressing where the element is drawn by a vacuum.
7. As to claim 15, the prior art does not teach or suggest a method for making a wound dressing in which a platen with a predetermined profile corresponds to the compliant element and the platen includes at least one groove defining the form of the compliant element of the backing layer and is selectively in communication with a vacuum. Claims 16-23 depend from claim 15 and are considered allowed.

Response to Arguments

8. Applicant's arguments with respect to the allowability of claim 24 has been considered but are moot in view of the new ground(s) of rejection.
